

96. Parallels and Scaffolds

The erecting, striking, storing and maintenance of all parallels and scaffolds, stationary or movable on rollers, for camera and lights. The placing of all overhead timbers for overhead lights, parallels, hangers and other similar devices. The erection, striking, storing and maintenance (except wire brushing, painting or any maintenance requiring the services of a metal worker) of all patent metal scaffold, interior and exterior. The foregoing shall not apply when outside contractors erect their own scaffolding for the maintenance and/or construction of permanent buildings.
